

I had an idea for an invention and before I signed the Contract and paid the services with Invent Help/Universal Payment/Intromark, I was informed that if I stopped my services with Invent Help, that I would not be responsible for any future payments to Universal Payment Corp, one of their sister companies. Invent help offered to finance the Total Package to entice me to make a quick decision. They provided incomplete information and contacts, and failure to give names of previous purchasers.

Invent Help/Universal Payment/Intromark are all one company (affiliated with each other), and share the same address. They are creating a diversion so that you do not connect the companies into one. Intromark attempts to market, license, promote inventions and have patent Attorney contacts. Should the invention be pickup by a company, Intromark (Invent Help's other sister company) requires royalties of 20%. In addition Invent Help's Sales personnel also receive a commission of 40% of what was paid down. They slowly stopped corresponding, the only time you heard from them was when they wanted the payment. This is what prompted me to stop services and investigate their company.

I have just recently stopped all services but am still receiving payment request from Universal Payment. Upon further research, I found out with the Federal Trade Commission that Invent help/Universal Payment/Intromark is a fraudulent company, taking inventors money. I talked to an Amy Stephans (800-766-1110 ext. 5704) at Universal Payment Corporation and told her that I have stopped all services with Invent Help, she responded in a disrespectful and rude manner, making threats, and unwilling to work the situation out. I then called Invent Help and spoke to Daniel Klein (262-717-0340) who said he couldn't do anything to help me.

I have paid a total of \$4911, over the course of the year, only to be misguided, uninformed, constant runaround, and not receiving services that were promised to me in my contracts.

Please realize that this was not money borrowed or loaned from Universal Payment or any other organization to pay for the invention submission, this is money that I saved up after I came back from Iraq. I have stopped the services so all payments should stop.

I want all money (\$4911) that I have paid to this company returned to me.

Thank you and God Bless.
